Calvin Institute of Technology

EXPERTISE

- React.js
- MERN stack
- Networkx
- Tensorflow
- pandas
- numpy
- SQL & No-SQL

PROFILE SUMMARY

Results-oriented Frontend Developer specializing in building scalable web applications with React.js and modern JavaScript. Proficient in architecting seamless user interfaces and integrating robust backend services using Express.js and Supabase to deliver comprehensive, end-to-end solutions. Committed to optimizing application performance through efficient RESTful API design and middleware implementation to enhance overall user experience.

EXPERIENCE

ADMINISTRATIVE & PROCUREMENT ASSISTANT

Aug 2024 — Aug 2025

PT Enviro Naga Mas Jaya

- I am responsible for managing and documenting all procurement activities related to construction project needs, include accurately recording purchase transactions and preparing detailed reports for management review. Also, I prepare regular attendance reports for team members and handle administrative documentation from clients (the contracting company) to ensure proper submission and coordination with my supervisor.

FEATURED PROJECTS

AI-Powered Resume Builder

WEB DEVELOPMENT

Built an AI-powered resume builder that assists users in creating optimized and professional resumes through intelligent content suggestions and formatting support.

UMKM Multi-Role Ecommerce

WEB DEVELOPMENT

I developed a multi-role e-commerce website that supports both user and administrative functionalities. The platform is designed not only for customers to browse and purchase products, but also for administrators to manage products, monitor transactions, and oversee overall system operations.

Retail Sales Dashboard

WEB DEVELOPMENT

I developed a Retail Sales Dashboard project that presents sales data analysis using dummy datasets for business simulation purposes. The dashboard is intended to provide actionable insights for business stakeholders, helping them understand sales performance, identify trends, and support data-driven decision-making and strategic planning.
